

NOTICE OF UPCOMING WORK

February 6, 2014

Water main assessment work to occur in your neighborhood March 11 - 13

PROJECT / DESCRIPTION

Seattle Public Utilities (SPU) will work in your neighborhood **March 11 – 13, 2015**. The work will involve shutting down a water main and running equipment through the pipe to assess its condition.

Crews will send pieces of equipment through the pipe from an entry fire hydrant and retrieve them through an exit fire hydrant at the end of the pipe. This process will help SPU determine the condition of the pipe and if it needs to be replaced.

*In order to perform this work, some customers will have their water shut off for one day on either **March 11, 12 or 13**.* Water will be shut down starting at 8 am and will remain off for eight to twelve hours. SPU will notify affected customers with a separate notice later this month and a reminder door hanger notification at least 72 hours in advance of the water shutdown.

SCHEDULE

Crews will begin work in the neighborhood around 7 am and end around 9 pm for three consecutive days.

LOCATION

Work will occur on 36th Avenue SW and 37th Avenue SW between SW Brandon Street and SW Morgan Street.

PROJECT IMPACTS

- **Water shutdown:** Some customers will be without water service for 8 to 12 hours for **one day**. Customers should not try to use water during this time.
- **Noise:** There will be increased noise from trucks and equipment used to assess the water main and flush the pipe.
- **Truck traffic:** Several large utility trucks will be parked in the neighborhood during the day.
- **Restricted parking:** Some street parking around the work zone will be restricted.
- **Temporary discolored water:** When the water is turned back on, some customers may need to run their faucets for a few minutes to remove any discoloration in the water.
