# **SEATTLE POLICE DEPARTMENT**

# Seattle Police Email Community Newsletter October 28, 2015

Dear Community Friends,

As we enter the Holiday Season, we once again wanted to provide you with recommendations to reduce your risk of being a crime victim this time of year. We hope you find the information useful and encourage you to share this with your neighbors.

#### **Car Prowl Prevention**

- When you exit or enter your parked vehicle, take a moment to look around the area.
- Turn off and lock your car whenever you have to walk away from it. This includes at gas pumps, ATMs, coffee shops, etc. Never leave your car idling and unattended.
- Leave No Valuables in Your Car. Items of little or no value to you still look inviting to a thief. Even pocket change is enough of an enticement for some thieves.
- If you must leave valuables in your car (say you're out shopping and still have some stops to make), make sure that nothing of value is within plain view. Place items in your car trunk out of sight. Do this when you get to your car, rather than waiting until you park at your next stop.
- Don't leave accessories visible in your car. You may have taken the Laptop or IPod in with you, but if you leave the USB cables for your laptop or earbuds for the IPod in the back seat, the offender may think those items are in the car and break in anyway.
- If you have a GPS, think about how it is mounted in your car. If the mounting for the GPS is visible, the thief may think the GPS is in the glove box or under the seat and may break in to try to get it. Have removable mounting for the GPS and put that out of sight as well.

# **Personal Safety**

- Before you leave home decide what you actually need to take with you rather than automatically taking your entire handbag or wallet out of habit. For example, if you are going to the grocery store for a few items, you can carry cash, a single check, or credit/debit card, I.D. and keys in a pocket.
- Wear clothing and shoes that are comfortable, low profile and appropriate for the weather. This may not be the most fashionable choice but it is the safest.
- Always plan your route and stay alert to your surroundings. Avoid shortcuts. Walk confidently. Scan your surroundings and make eye contact with people.
- Carry your keys and ID separately. If someone gets your keys and ID, they may go to your home or business and access that location with the keys.
- Always maintain positive control over your items. Don't tempt a thief by leaving your purse, wallet or packages unattended. It only takes a second to grab them. Never leave your purse unattended, even if it is in a shopping cart.
- If you carry a purse, don't dangle it from your arm. Carry it very close to you, preferable with the strap over your shoulder and the purse to the front of your body. Even better would be to carry the purse over your shoulder across your body and <u>under</u> your coat.
- Take a friend along when doing holiday shopping. Using the buddy system reduces your chances of being a victim of robbery.
- When paying by cash, only take out the amount needed and keep the remainder out of view. It's always a good idea to carry minimal amounts of cash, regardless of the time of year.
- Beware of strangers who bump, shove or get too close. Pickpockets may use these diversions to lift your wallet.
- Be cautious of those you don't know who offer to carry bags and packages for you. Depending on where you shop, store personnel or mall security may offer assistance in carrying packages to your car or escorting you to your vehicle.
- Before returning to your car, make sure you're not over-burdened with packages. Have your car keys in hand to avoid searching for them when you reach your car.
- If you are attacked on the street, make as much noise as possible by calling for help or blowing a whistle. <u>Do not</u> pursue your attacker. Call 911 and report the crime as soon as possible.

### When Using an Automated Teller Machine

- Only take out the amount you need, rather than the maximum you can get.
- Don't walk away from the cash machine counting your money. That's an invitation to someone who may not have the best of intentions in mind.
- Secure your money and your bank/credit card back in your wallet or pocket before leaving the ATM.
- Beware of strangers hanging around the ATM. Wait until they leave, or consider using an alternate cash machine. You should report suspicious people to bank personnel, mall security and/or police.
- Using the ATM inside a major grocery store might be a better alternative to using one on the street, especially during hours of darkness.
- Always keep your PIN separate from your bank and/or credit card.

# **Prevention Tips At Home**

- Don't openly display wrapped or received gifts so they are easily visible from the street. You increase the possibility that a burglar will be tempted to gain entry and steal the gifts.
- When disposing of the packaging in which gifts and other purchases come, realize that when you place these out for recycling or trash collection, those boxes sitting out on the curb on collection day give a passer-by a pretty good indication of what's in your home. Recycle the packaging, yes but break the boxes down first, turn them inside out so the exterior writing does not show, and don't put them out until collection day.
- Burglars often enter through unlocked doors or windows. When exterior Christmas light extension cords are run inside through a window, this prevents the window from being secured, and this unsecured window is visibly noticeable. Consider installing an inexpensive exterior outlet for your holiday lights so you don't provide an opened and unlocked entry to your home.
- If you are going to be away, let your trusted neighbors know so that they can watch your home for you. If they see suspicious activity while you are gone, they will know to call 911 for you.

#### Seattle Police Releases Crime Data Dashboard

Please see the below information from our Public Affairs section from October 21, 2015 regarding the Seattle Police Crime Data Dashboard. The information has been edited for space. You can view the entire article at <a href="http://spdblotter.seattle.gov/2015/10/21/seattle-police-department-launches-crime-data-dashboard/">http://spdblotter.seattle.gov/2015/10/21/seattle-police-department-launches-crime-data-dashboard/</a>. We hope you find this information and the application useful.

Today, the Seattle Police Department <u>launched its Crime Data Dashboard</u>, giving Seattle residents access to the same statistical information on incidents of property and violent crime used by SPD commanders, officers and analysts to direct police patrols. You can find the dashboard on our website at: <a href="http://www.seattle.gov/seattle-police-department/crime-data">http://www.seattle.gov/seattle-police-department/crime-data</a>.

The Department developed the Crime Data Dashboard, which is the public-facing version of the dashboard that drives the SeaStat process, as part of its ongoing efforts to enhance public trust through transparency and to continue its push to effectively address crime and disorder in the City through its data-driven and community policing approach.

Dashboard users will now be able to view and sort historic and current data on crime across the city, in precincts, and in each Micro Community. Data on the dashboard is refreshed on a monthly basis and will account for any ongoing changes in the status of an investigation. Additionally, all of the data released through the dashboard is open-source and downloadable for further analysis.

For information about the Dashboard's functions and features, check out the following video: <a href="https://www.youtube.com/watch?feature=player\_embedded&v=yeqL6U1MN5M">https://www.youtube.com/watch?feature=player\_embedded&v=yeqL6U1MN5M</a>

Until next time, Take Care and Stay Safe!
