We are redesigning the streets around the Endolyne Triangle for safety starting the second week of August. This project represents the culmination of decades of work by the Fauntleroy Community Association to enhance traffic safety and improve parking in the area.

This project will change SW Brace Point Drive to a one-way, eastbound street, provide 7 new back-in angle parking spaces, enhance pedestrian crossings with three paint-and-post curb bulbs with plantings, and install on-street bicycle parking. This project will also restrict parking on a short segment of SW Wildwood Place to increase safety.

Construction is scheduled to last approximately one week with minimal impacts to residents, businesses, and travelers. Later this year, we will return to install 12 planter boxes in the new paint-and-post curb bulbs to help clearly define the pedestrian space.
