

West Seattle and Ballard

Link Extensions

PROJECT ALERT

October 2019

Geotechnical work near you

Nighttime Soil Sampling

Starting as early as **October 8, 2019**, Sound Transit will begin drilling to collect soil samples for analysis at **Harbor Marina Corporate Center (Terminal 102)**; see reverse side for boring locations and estimated timeline. This work will inform planning of the West Seattle and Ballard Link Extensions Project.

What to expect

- Work at Terminal 102 will occur during nights, from 6:00 pm – 7:00 am.
- Each boring will take approximately 5-7 days and will be filled and patched with a flush-mounted monument surface when work is complete.
- The borings will be located in parking lots and/or driveways.
- At least 72 hours prior to each boring, Sound Transit will notify the Port of Seattle, Northwest Seaport Alliance and impacted tenants; where necessary, “no parking” signs will be placed near impacted parking spots.
- Expect cones, signs and traffic control to direct traffic around drilling equipment and trucks in the area. Temporary parking restrictions and pedestrian detours will be in place as needed.
- Drilling equipment will sound similar to a truck engine running with intermittent hammering noise.
- Please call the 24-hour hotline if you have questions during the work: **1-888-298-2395**.

The West Seattle and Ballard Link Extensions Project is part of the voter-approved Sound Transit 3 Plan (ST3) to expand the regional mass transit system. When complete in 2030 and 2035, these extensions will provide fast, reliable light rail connections to dense residential and job centers throughout the region.

Boring locations and schedule

● Approximate boring locations

Timeline and future geotechnical work

Drilling at each location is anticipated to last approximately 5-7 days. Work will occur during nights, from 6:00 pm – 7:00 am. The anticipated start dates are tentative and subject to change. At least 72 hours prior to each boring, Sound Transit will notify the Port of Seattle, Northwest Seaport Alliance and impacted tenants.

Throughout 2019 and beyond, Sound Transit plans to work at various locations on Port of Seattle and Northwest Seaport Alliance property to collect soil samples for analysis. This work will inform planning of the West Seattle and Ballard Link Extensions Project.
