

NOTICE OF UPCOMING WORK

APRIL 14, 2022

CONSTRUCTING NATURAL DRAINAGE SYSTEMS (NDS) on 24TH AVE SW

PROJECT DESCRIPTION

Seattle Public Utilities (SPU) will install natural drainage systems in the roadway shoulder along 24th Ave SW between SW Thistle St and SW Barton St to help improve stormwater drainage, slow down traffic, and remove pollutants from stormwater runoff to improve water quality in Longfellow Creek, a salmon-bearing creek. As part of this project, SPU is partnering with the Seattle Department of Transportation (SDOT) to install a sidewalk along the west side of 24th Ave SW from SW Thistle St to SW Barton St. Visit the project webpage for more information: www.seattle.gov/utilities/longfellowNDS.

SCHEDULE

Construction for this project will begin as soon as mid-April and is expected to last through late 2022/early 2023.

LOCATION

24th Ave SW between SW Thistle St to SW Barton St (see map below)

Seattle Public Utilities provides essential services — pure mountain drinking water, recycling and composting that lead the nation, and sewer and drainage systems to protect our local waterways — that safeguard your health and our shared environment, and help keep Seattle the best place to live.

NOTICE OF UPCOMING WORK

ANTICIPATED IMPACTS

Crews will work block by block beginning with storm work and then roadway work. Crews will then complete landscaping and planting. You can expect the following once construction begins:

- Work will generally occur during weekday, daytime hours
- Construction noise, dirt, dust, and vibrations
- To minimize disruption, work will generally be done in segments moving along 24th Ave SW
- Parking restrictions and temporary lane closures near the work area
- Temporary blockage of driveway access during some construction activities. When possible, the contractor will work to reopen access during nights and weekends.
- Materials and equipment staged along the road edge near construction activities
- The contractor will work to maintain access for delivery services, garbage/recycling/compost pick-up, and emergency vehicles. In some instances, mailboxes may be temporarily relocated during construction to facilitate deliveries.
- Some residents may experience brief, temporary water service interruptions to facilitate water meter relocation. Advanced notice will be provided prior to planned water outages.
- Removal of street trees in areas where NDS and sidewalks will be installed and installation of new street trees along 24th Ave SW in accordance with SDOT's Urban Forestry requirement to improve Seattle's tree canopy (For more information: <https://www.seattle.gov/trees/management/canopy-cover>).
- Installation of curb and gutters and driveway aprons along 24th Ave SW as well as final street pavement restoration, which may require 24-hr/day closures to allow for curing
