Building a bike lane connection between SW Avalon Way and Delridge Way SW

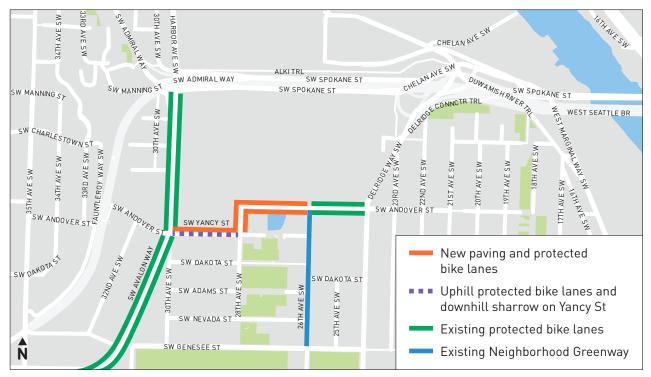

We are creating more space for people to safely bike between existing protected bike lanes on SW Avalon Way and SW Andover Street. This project will connect the neighborhoods near Delridge Way SW.

ABOUT THE PROJECT

- Adding new pavement on the north side of SW Andover Street. The new pavement will create space for a westbound protected bike lane, filling a gap in our existing bike network in West Seattle.
- Completing street drainage and landscaping improvements on SW Andover Street.
- Building protected bike lanes on both sides of SW Andover Street between 26th Ave SW and 28th Ave SW and down 28th Ave SW to SW Yancy Street.

- Adding a westbound (uphill) protected bike lane on the north side of SW Yancy Street and an eastbound (downhill) shared biking and driving space (sharrow) that will preserve parking and loading on the south side of SW Yancy Street.
- Removing parking on both sides of 28th Ave SW between SW Yancy St and SW Andover St.
- Removing parking along the north side of SW Yancy Street between 28th Avenue SW and SW Avalon Way.
- Moving the 15-minute vehicle loading zone on the north side of SW Yancy Street to the south side of the street and turning it into a 30-minute loading zone.

SW Andover St and 28th Ave SW Protected Bike Lane Connection

Paving work from last week on SW Andover Street

WHAT TO EXPECT DURING CONSTRUCTION

We finished paving on SW Andover Street last week. As soon as this Friday, August 26, 2022, we will start striping the new street layout and bike lane. This will complete the project.

During construction, we'll need to occasionally close travel lanes. We do not expect significant impacts to people driving. We'll also need to put up temporary "no parking" signs and we will place these at least 72 hours in advance of construction.

Work hours are weekdays from approximately 9 AM to 3 PM to avoid peak commute times and weekends from approximately 8 AM to 5 PM.

If you are travelling in the area, please expect delays, drive safely in work zones, and follow directions from signs and flaggers.
